Principles to Ensure Student Access to Fully Prepared and Effective Teachers Under ESEA and HEA Title II

Research indicates that teacher quality is the most important school factor impacting student achievement. Yet, students in low-income and minority schools are far less likely to have access to well-prepared and effective teachers, as are students with disabilities and English learners. In many communities, students experience a revolving door of untrained and under-supported novice teachers who cannot sustain a high-quality education.

To promote and support the creation of a stable supply of qualified, effective educators for all communities, we put forward the following principles for ESEA and HEA Title II reauthorization.

FULLY PREPARED AND EFFECTIVE TEACHERS FOR ALL STUDENTS

- 1. All students are entitled to teachers who are qualified (fully prepared and fully certified), as well as effective. The requirement that qualified teachers should be assigned to all students and that states and districts make progress to ensuring that all of their teachers are qualified -- should be continued. To meet the "qualified" standard, teachers must have completed a full preparation program and have met full state certification standards in the field they teach.
- **2.** Teachers in training, if assigned as teacher of record, must be accurately identified, equitably distributed, and adequately supervised. Where fully prepared teachers are not available, teacher trainees may be hired. In these cases, parents must be informed that their child's teacher has not completed preparation and has not yet fully met state certification standards, and states and districts must report on the distribution of such teachers, by teaching field and school, and be required to distribute these teachers equitably. In addition, districts must ensure that such teachers and their students are closely overseen by a fully qualified and experienced Supervising Teacher who coaches and observes regularly in the classroom, reviews and signs off on lesson plans and assessment practices, tracks the progress of students, and ensures that the needs of all students, including students with disabilities and English learners, are being adequately met. The Supervising Teacher must be identified to parents and provided with release time and training to serve in this role.
- 3. Teacher effectiveness should be evaluated based on valid measures of teacher performance. For *Entering teachers* (whose classroom performance cannot be fully evaluated for some time), we recommend that, in addition to full preparation, effectiveness be evaluated by passing a robust, field-specific teacher performance assessment that validly and reliably measures whether a teacher can successfully teach diverse students in the classroom. *Experienced teachers* should be evaluated by trained assessors on the basis of professional teaching standards, their joint efforts to improve learning within the school, and appropriate and multi-faceted evidence of their contributions to student learning. The results of these multi-faceted evaluations should be used to guide professional development and personnel decisions: Teachers who do not meet standards of effectiveness should be offered the support necessary to improve, and those who do not improve should be removed.
- 4. Any determinations made about the status of an individual teacher (e.g. qualified, effective) should be based on that individual teacher's demonstrated skill, knowledge and ability. An individual's status should not be based on the preparation program or pathway he/she is enrolled in or previously attended.

EQUITABLE DISTRIBUTION OF PREPARED AND EFFECTIVE TEACHERS

5. ESEA comparability provisions should be strengthened and enforced in order to ensure equitable resources and equally qualified teachers across schools serving different populations of students. ESEA should strengthen and enforce comparability requirements to ensure that poor and minority students, and students with disabilities, do not experience disproportionate numbers of *uncertified*, *inexperienced*, or *out-of-field* teachers. In addition, teachers identified as "trainees" (i.e., less than fully prepared teachers) or "not effective" should not be disproportionately concentrated in poor and minority schools.

POLICIES TO DEVELOP EFFECTIVE TEACHING

- **6.** Preparation programs should be held to common, high standards. Credentialing programs should provide general and special education teachers with the content and pedagogical knowledge, skills and expertise needed to support learning for all students. Traditional and alternative route certification programs should be held accountable for both program quality and multiple indicators of graduates' ability to teach successfully. Programs that do not meet standards should have an opportunity to improve, and if no improvement is shown over a reasonable period of time, they should be closed.
- 7. <u>Investments should be made in proven methods to recruit, prepare, develop and retain fully prepared and effective teachers in shortage fields and hard to staff schools.</u>
 - a. Expand and redesign the TEACH grants program so that it offers larger, more easily accessed grants to individuals preparing to enter teaching who will stay in high-need fields and locations for at least 4 years.
 - b. Use the Public Interest component of the Direct Student Loan program as a recruitment and retention tool by underwriting the first three years of loan payments for individuals who prepare for and enter teaching in Title I schools.
 - c. Fully fund the Teacher Quality Partnership grants under Title II of HEA (authorized at \$300 million annually) that support teacher residency programs and partnership school initiatives.
 - d. Increase investments in personnel preparation for special education and related service providers under IDEA, and for teachers of English learners under Title III of ESEA.
 - e. Invest in Grow-Your-Own programs, especially in high need communities, as well as teacher education programs in Minority-Serving Institutions that will prepare a strong pipeline of teachers and leaders in minority, low-income and rural communities.
 - f. Increase investments in high-quality professional development for all educators under Title II of ESEA, and ensure that educators have opportunities to learn to teach diverse students well.
 - g. Focus school turnaround efforts and teacher incentives on conditions that influence teacher retention and effectiveness: productive working conditions, effective instructional leadership, job-embedded professional development, mentoring, coaching, and time for collaboration.
 - h. Invest in the preparation and retention of expert principals and offer stipends for National Board Certified Teachers and those who take on master or mentor teaching roles in high-need schools
